## What is a nuckees?

Nuckees is the first grip that grips back. Featuring our patented Snug-Hug technology, nuckees gives your fingers a break, doing all the holding for you with its ultra-comfortable and secure fit. No matter what size your hands and fingers, nuckees gives you the most custom hold out of any other grips on the market. Nuckees also doubles as a 4-way kick-stand letting you watch videos and FaceTime with ease.

## What is Snug-Hug Technology?

Snug-Hug technology is what makes nuckees hug your fingers. It's expandable, allowing nuckees to do ALL the holding for you, fitting any size fingers snug and comfortably. Snug-Hug also automatically retracts when not in use, keeping your phone slim and nuckees out of the way.

## Why won't my nuckees stick to my phone?

For best results, wipe down the area with alcohol before use to get rid of any dirt and oil. Still not sticking? Certain silicone, textured and waterproof cases, as well as the iPhone 8/8Plus & iPhone X shells are resistant to nuckees adhesive due to their anti-fingerprint coating.

*Solution: Apply the Extra Sticky Disc included in the package. When applied to the back of your nuckees, adhesive issues should be eliminated.*

## How do I remove nuckees from my phone?

Remove nuckees from your phone by peeling up slowly from one side of the base. Another option is to use something slim and sturdy like a credit card or even dental floss. Slide it under your nuckees base and it should peel off easily.

Keep in mind that your disc can be repositioned up to three times.

Size:  
41.275 x 6.35 mm (1.625" x 0.25")

Decoration area:  
40.386 mm (1.59") diameter
