

## NFC4 Personalized metal NFC card

Solidify your digital presence with this professional NFC metal anodized card that reveals your contact information, social media, and website address with a simple tap. Unlike a paper card, a NFC business card allows you to transfer your contact details to a compatible smartphone in an instant without the need for internet. The card can be easily programmed using your phone and a NFC writing app.

- Size: 85 x 54 mm (3.35" x 2.13")
- NFC type ntag215 (540 bytes, 504 usable bytes, 490 characters)
- Frequency: 13.56 MHz
- V-Card fields 9-10
- Data retention: 10 years
- Read/write endurance: 100,000 cycles
- Compatibility: all NFC smartphones, NFC tablets, and ISO14443-A NFC readers

- Interactive, programmable, durable, environmentally friendly, reusable
- No app needed to read card, just a tap is needed
- Optional QR laser engraving or print along with your information (minimum size requirement for QR code is 1" x 1")
- Easy to program with several free apps including NFC TOOLS and BLK CARDS (Google Play, Apple Store)

Quick guide to personalize/program your NFC card:

- 1) Create a link (URL) to your contact details or use your company's URL. If you want a personal URL, use your LinkedIn Page, Instagram profile page or use Linktree for free to create this link.
- 2) Use NFC TOOLS app to associate your URL to the card. Open the NFC tools app, select **WRITE** from the main menu and add **record**. Select URL/URI from the list and enter a URL to your digital profile (from step 1). Click **OK** in the top right corner.
- 3) Test the NFC card by holding it in front of a phone other than yours. The phone asks if you wish to open a URL in browser. You should now see your digital profile!
